International Society of Microbiota

5th World Congress on

Targeting Microbiota

October 26-27, 2017 - Steigenberger Hotel Berlin, Germany

Dear Colleagues,

On behalf of the members of the scientific committee, we are pleased to inform you about the **strategies for our annual meeting: 5th World Congress on Targeting Microbiota**, which will be held in Berlin, Germany on October 26-27, 2017.

A substantial amount of evidence has shown that a diverse population of micro-organisms live in our skin, mouth, nose, lungs and intestines, where they play a strategic role in regulating and possibly controlling human health, well-being, metabolism and diseases.

During both days, many oral and poster communications will be presented and will cover many hot topics:

- Microbiota 2017: Recent Advances & Perspectives
- Challenges of microbiota sequencing and analyzing: How to interpret the results?
- Challenges of microbiota-host cross-talk understanding and intestinal microbiome signaling to extraintestinal organs
- Microbiota & medicine of tomorrow: Development of effective therapeutic strategies to manipulate the gut microbiota

During this two-day conference, we will try to answer many questions, among them:

- Can we modulate the quality and diversity of human microbiota?
- How to induce durable beneficial changes in gut microbiota?
- Where is the red line of the gut microbiota manipulation?
- What are the strategic mediators of gut microbiota?
- How to understand better the role of bacterial metabolites?
- What is the perfect microbiota "signature" and how to use it as a biomarker to "predict" and/or treat many diseases?

We very much look forward to seeing you in Berlin for this exciting event.

Prof. Lorenzo Drago

University of Milan, Italy

President of the International Society of Microbiota

Prof. Marvin Edeas

University Paris Descartes, Cochin Institute, France

Prof. Peter Konturek

Thuringia-Clinic Saalfeld, Germany

Co-chairmen of the Scientific Committee

International Society of Microbiota

Targeting Microbiota 2017 Congress Speakers

Microbiota & Mitochondria intertalk in hemodialysis patients
Marvin Edeas
University Paris Descartes, Institut Cochin, France

Role of microbiota in Graft-versus-Host Disease (GvHD) and complications of allogeneic stem cell transplantation
Daniela Weber
Regensburg Universitätsklinikum, Germany

Skin microbioma approaches: atopic dermatitis versus psoriasis
Lorenzo Drago
University of Milano, Italy

Human gut microbiota: from structures to functions
Hervé Blottière
INRA, France

Microbiota and autoimmune diseases: a shield or a sword?
Filippo Canducci
University of Insubria, Italy

The microbiota, epigenome and transcriptome of colonic inflammation in inflammatory bowel disease
Marcus Claesson
University College Cork, Ireland

Novel techniques in microbiota research: from meta-omics to single cells
Jakob Zimmermann
University of Bern, Switzerland

Lactobacilli modulate epithelial cytoprotection through the Nrf2 pathway
Indoles from commensal bacteria extend healthspan
Rheinallt M. Jones
Emory University School of Medicine, USA

Hemodynamic effects of hydrogen sulfide, indole and tmao-gut bacteria-derived molecules: the role of the gut-blood barrier
Marcin Ufnal
Medical University of Warsaw, Poland

Unraveling the gut microbiome of the long-lived naked mole-rat
Gerd Birkenmeier
University of Leipzig, Germany

RNA-based stable isotope probing to link structure and function of prebiotics-assimilating intestinal microbiotas
Markus Egert
Furtwangen University, Germany

Advances in fecal microbiota transplantation
Peter Konturek
Teaching Hospital of the University of Jena, Germany

Metabolic, epigenetic, and transgenerational effects of gut bacterial choline consumption
Federico Rey
University of Wisconsin Madison, USA

The human infant gut microbiota mobilome
Knut Rudi
Norwegian University of Life Sciences, Norway

Dysbiosis profiling and pediatric diseases: pattern correlations and bacterial dysfunctions
Lorenza Putignani
Bambino Gesù Children's Hospital and Research Institute, Italy

Probiotics and bone health: recent scientific advances and perspectives
Roberto Pacifici
Emory University School of Medicine, USA

The microbiota-gut-brain axis: modulation by probiotics and antibiotics
Paul Forsythe
Mc Master University, Canada

Probiotics as potential therapeutics in the management of metabolic syndrome
Ryo Aoki
Ezaki Glico Co., Japan

Intestinal microbiota and primary sclerosing cholangitis: is there any link?
Johannes Hov
University of Oslo, Norway

Host genetics driving gut microbiota composition: experimental challenges
Andy Wullaert
Ghent University, Belgium

Culturomics: illuminating dark matter
Grégory Dubourg
Aix-Marseille Université, France

Microbiota, bacterial translocation and inflammation in chronic kidney disease
Didier Ducloux
CHU Besançon, France

www.microbiota-site.com

International Society of Microbiota

5th World Congress on

Targeting Microbiota

October 26-27, 2017 - Steigenberger Hotel Berlin, Germany

Day 1 – Thursday, October 26

7h45 Welcoming & registration of attendees

8h55 Introduction note by Targeting Microbiota 2017 Chairpersons
Lorenzo Drago, Marvin Edeas, Peter Konturek

Session 1: Microbiota 2017: Recent Advances & Perspectives

Chairpersons: Lorenzo Drago - Marvin Edeas

9h00 Role of microbiota in Graft-versus-Host Disease (GvHD) and complications of allogeneic stem cell transplantation
Daniela Weber, Regensburg Universitätsklinikum, Germany

9h25 Microbiota and autoimmune diseases: a shield or a sword?
Filippo Canducci, University of Insubria, Italy

9h50 Host genetics driving gut microbiota composition: experimental challenges
Andy Wullaert, University of Ghent, Belgium

10h15 Lactobacilli modulate epithelial cytoprotection through the Nrf2 pathway
Comments on Indoles from commensal bacteria extend healthspan
Rheinallt M. Jones, Emory University School of Medicine, USA

10h45 Coffee Break & Poster Session

Chairpersons: Gerd Birkenmeier – Paul Forsythe

11h15 The human infant gut microbiota mobilome
Knut Rudi, Norwegian University of Life Sciences, Norway

11h40 Hemodynamic effects of hydrogen sulfide, indole and TMAO-gut bacteria-derived molecules: the role of the gut-blood barrier
Marcin Ufnal, Medical University of Warsaw, Poland

12h05 Role of nasal microbiota in respiratory recurrent infections
Desiderio Passali, Honorary President Italian Society of Rhinology, Italy

Short oral presentations (7 minutes presentation + 3 minutes questions)

12h20 The gut microbiota is a crucial regulator of local intestinal androgen metabolism in male mice
Hannah Colldén, University of Gothenburg, Sweden

12h30 Antibiotic-induced microbiota perturbation causes gut endocannabinoidome changes, hippocampal neuroglial reorganization and depression in mice
Francesca Guida, University of Campania, Naples, Italy

12h40 Lunch Break & Poster Session

International Society of Microbiota

Session 2: Challenges of microbiota sequencing and analyzing: How to interpret the results?

Chairpersons: Knut Rudi – Markus Egert - Filippo Canducci

- 14h00 Human gut microbiota: from structures to functions**
Hervé Blottière, INRA, France
- 14h25 RNA-based stable isotope probing to link structure and function of prebiotics-assimilating intestinal microbiotas**
Markus Egert, Furtwangen University, Germany
- 14h50 Novel techniques in microbiota research: from meta-omics to single cells**
Jakob Zimmermann, University of Bern, Switzerland
- 15h15 Culturomics: illuminating dark matter**
Grégory Dubourg, Aix-Marseille Université, France
- 15h40 Coffee Break & Poster Session
- 16h40 Short oral presentations for sessions 1 & 2 (7 minutes presentation + 3 minutes questions)**
- Iron supplements modulate colon microbiota composition and potentiate the protective effects of probiotics in dextran sodium sulfate-induced colitis**
Manuela Santos, Canadian Cancer Society Research Institute, Canada
- The role of gut microbiota in the development of angiotensin II induced vascular dysfunction in mice**
Rebecca Schüler, University Medical Center Mainz, Germany
- Exposure to antibacterial chemicals influence oral microbiome composition**
Randi J. Bertelsen, University of Bergen, Norway
- The role of the microbiota in neurodegeneration: molecular mechanisms and prospects for gene therapy**
Robert Friedland, University of Louisville, USA
- Exploring the gut microbiome role in Parkinson's disease and in primary parkinsonisms**
Clarissa Consolandi, National Research Council, Italy
- Early life determinants of the fecal resistome**
Aimee Marguerite Baumann-Dudenhoeffer, Saint Louis School of Medicine, USA
- Newborn meconium microbiota diversity is related to maternal and cord blood lipid profiles**
Shu-Ling Chuang, Chelsea & Westminster Hospital, United Kingdom
- Identification of a microbial signature of colonic hypersensitivity in IBS-like murine models**
Frédéric Antonio Carvalho, University of Auvergne, France
- Culture-independent characterization of spores in stool samples**
Ekaterina Avershina, Norwegian University of Life Sciences, Norway
- Next generation 16S ribosomal RNA gene sequencing reveals intestinal bacterial genera with a potential role in Parkinson's disease**
Severin Weis, Hochschule Furtwangen, Germany
- Applying quality engineering principles to enhance reproducibility of longitudinal metagenomics studies**
Héloïse Breton, DNA Genotek, Canada
- Design of microbiome cohort studies – lessons learned from preparatory phase**
Petra Videnska, Masaryk University, Czech Republic
- A commensal gut bacteria MRX0004 alleviates inflammatory responses in a severe asthma model through reduction of neutrophil infiltration to the lung**
Emma Jane Raftis, 4D Pharma PLC, United Kingdom
- 18h40 End of the first day**
- 20h30 Dinner between speakers and attendees.**
To participate, please register online before October 12. The exact venue will be communicated soon.

International Society of Microbiota

Day 2 – Friday, October 27

8h25 Opening of the second day

Session 3: Challenges of microbiota-host cross-talk understanding and intestinal microbiome signaling to extraintestinal organs

Chairpersons: Peter Konturek - Hervé Blottière

8h30 **Microbiota & mitochondria intertalk in hemodialysis patients**
Marvin Edeas, University Paris Descartes, Institut Cochin, France

8h55 **Microbiota, bacterial translocation and inflammation in chronic kidney disease**
Didier Ducloux, CHU Besançon, France

9h20 **Intestinal microbiota and primary sclerosing cholangitis: is there any link?**
Johannes Hov, University of Oslo, Norway

9h45 **The microbiota, epigenome and transcriptome of colonic inflammation in inflammatory bowel disease**
Marcus Claesson, University College Cork, Ireland

10h10 *Coffee Break & Poster Session*

10h55 **Dysbiosis profiling and pediatric diseases: pattern correlations and bacterial dysfunctions**
Lorenza Putignani, Bambino Gesù Children's Hospital and Research Institute, Italy

11h20 **The microbiota-gut-brain axis: modulation by probiotics and antibiotics**
Paul Forsythe, Mc Master University, Canada

11h45 **Skin microbioma approaches: atopic dermatitis versus psoriasis**
Lorenzo Drago, University of Milano, Italy

12h10 **Short oral presentations** (7 minutes presentation + 3 minutes questions)

Are quorum sensing peptides the missing link between microbiota and disease?
Evelien Wynendaele, Ghent University, Belgium

Modulation of adult neurogenesis by the microbiome; with a little help from the immune system
Susanne Asu Wolf, University Hospital Charite, Germany

The neonatal transfer of intestinal microbiota partially reverses microbiota dysbiosis in rats with intra-uterine growth retardation
Catherine Michel, INRA-Université de Nantes, France

Effects of 5-fluorouracil chemotherapy on colon inflammation, gut microbiota, and adverse physiological outcomes
Alexander Theodore Sougiannis, University of South Carolina School of Medicine, USA

Modulation of skeletal muscle function by gut microbiota dysbiosis and reseeded
Kévin Nay, INRA, France

13h00 *Lunch Break & Poster Session*

International Society of Microbiota

Session 4: Microbiota & medicine of tomorrow: Development of effective therapeutic strategies to manipulate the gut microbiota

Chairpersons: Rheinallt M. Jones - Federico Rey

14h15 Advances in fecal microbiota transplantation

Peter Konturek, Teaching Hospital of the University of Jena, Germany

14h40 Metabolic, epigenetic, and transgenerational effects of gut bacterial choline consumption

Comments on the social ties linked with gut microbiota

Federico Rey, University of Wisconsin-Madison, USA

15h05 Probiotics and bone health: recent scientific advances and perspectives

Roberto Pacifici, Emory University School of Medicine, USA

15h30 Unraveling the gut microbiome of the long-lived naked mole-rat

Gerd Birkenmeier, University of Leipzig, Germany

16h00 Coffee Break & Poster Session

16h30 Probiotics as potential therapeutics in the management of metabolic syndrome

Ryo Aoki, Ezaki Glico Co., Japan

16h55 Short oral presentations (7 minutes presentation + 3 minutes questions)

Can dietary probiotics reduce human stress via the microbiome-gut-brain axis?

Carl Gordon Johnston, Youngstown State University, USA

SYN-004 (Ribaxamase) protects the diversity of the gut microbiome in patients receiving intravenous ceftriaxone treatment

John Kokai-Sun, Synthetic Biologics, Inc., USA

Exploring the microbial taxonomic and metabolic alterations during faecal microbiota transplantation for the treatment of clostridium difficile infection

Lee Kellingray, Quadram Institute Bioscience, United Kingdom

Probiotics modulated gut microbiota suppresses hepatocellular carcinoma growth in mice

Gianni Panagiotou, Hans Knoll Institute, Germany

The influence of ketogenic diet in gut microbial diversity of obese Mexican adults with type 2 diabetes

Victor Armando Martinez Silva, Cinvestav-IPN, Mexico

Cross-talk between the microbiota and their sisters, the mitochondria: the real cause of mitochondrial health or dysfunction?

Steven Gundry, Center for Restorative Medicine, USA

17h55 Health Optimization Medicine (HOME): a framework to include microbiota and mitochondria in clinical practice

Theodore Achacoso, BioBalance Wellness Institute and Health Optimization, USA

18h10 Concluding remarks with Lorenzo Drago, Marvin Edeas, Peter Konturek

Targeting Microbiota 2017 Awards

18h30 End of Targeting Microbiota 2017
