

6th World Congress on Targeting Microbiota

International Society of Microbiota

Targeting Microbiota 2018

Towards Clinical Revolution

Preliminary Agenda

October 28 - 30, 2018 - Porto, Portugal

www.microbiota-site.com

International Society of Microbiota

Congress Sessions:

- Microbiota 2018: recent advances & challenges
- Recent analysis, methods, bioinformatics & interpretations
- Strategic role of metabolites and mediators on the microbiota-host cross-talk
- Strategies to manipulate microbiota & medicine of tomorrow

Call for Abstracts

Mon. Short Oral Submission
Sept. 17, 2018

Thur. Poster Submission
Sept. 27, 2018

Register & Save before

Wed. Early Bird Registration
July 11, 2018

Microbiota 2018 Speakers

Recent advances on gut microbiota and food intolerances

Yurdagül Zopf
University of Erlangen-Nuremberg, Germany

Psycho neuro immunology and gut microbes

Paul Forsythe
McMaster University, Canada

Targeted gut microbiota and short chain fatty acid profile among term and preterm infants

Jan Mazela
Poznan University of Medical Sciences, Poland

Honor thy lodgers? Interactions between the built environment microbiome and the human microbiome

Markus Egert
Furtwangen University, Germany

Phage therapy strategy to modulate the child stunting microbiota

Mohammadali Khan Mirzaei
McGill University, Canada

Crosstalk between gut microbiota, innate immune cells and endocrine cells in the pancreas regulates autoimmune diabetes

Julien Diana
Inserm, France

Exploring the role of gut dysbiosis in neuroinflammation and hypertension

David Durgan
Baylor College of Medicine, USA

Impact of antibiotic treatment on the human microbiota - a review of the clinical implications

Maria Vehreschild
University Hospital of Cologne, Germany

Role of microbes in stem cells transplantation related complication

Ernst Holler
University Hospital Regensburg, Germany

MAIT cells (Mucosal-Associated Invariant T cells) in liver disease and antibacterial response

Antonio Riva
Institute of Hepatology London, United Kingdom

The effect of gut bacterial metabolites on cardiovascular risk

Marcin Ufnal
Medical University of Warsaw, Poland

International Society of Microbiota

Dear Colleagues,

On behalf of the International Society of Microbiota, we are pleased to inform you that the **6th World Congress on Targeting Microbiota** will be organized at **Porto, Portugal, on October 28-30, 2018**.

During both days, many oral and poster communications will be presented and will cover many hot topics:

- Microbiota 2018: Recent Advances & Perspectives
- Challenges of microbiota sequencing and analyzing: How to manage the Big Data of sequencing?
- Challenges of microbiota-host cross-talk understanding and intestinal microbiome signaling to extraintestinal organs
- Microbiota & medicine of tomorrow: Development of effective therapeutic strategies to manipulate the gut microbiota

During Targeting Microbiota 2018, we will try to answer many question, among them:

- Can we modulate the quality and diversity of human microbiota?
- How to induce durable beneficial changes in gut microbiota?
- Where is the red line of the gut microbiota manipulation?
- What are the strategic mediators of gut microbiota?
- How to understand better the role of bacterial metabolites?
- What is the perfect microbiota "signature" and how to use it as a biomarker to "predict" and/or treat many diseases?
- What is the influence of gut microbiota on the development and progression of chronic diseases?

I do believe that this would be the best future strategy for the 6th World Congress of Targeting Microbiota in 2018: **a strong communication between basic, pre-clinical scientists and clinicians.**

Microbiota & Medicine of Tomorrow: The Revolution

The scientific committee of ISM and in particular Prof. Marvin Edeas (Institut Cochin, Université Paris Descartes, France), founder of the International Society of Microbiota (ISM) wish to highlight: *"...there is a deep transformation in our current medicine where big data and Artificial Intelligence will play a strategic role in the medicine of tomorrow. How all big data generated by microbiota sequencing can be used? Can we talk about Artificial Intelligence and microbiota medicine? We wish to open the door for this kind of discussion..."*

So, I hope to meet you at the next meeting in order to capture moments of relationship and scientific inspirations by the many and best scientists we have in the world studying the various aspects of the microbiota.

We very much look forward to seeing you in Berlin for this exciting event

Prof. Peter C. Konturek - President of ISM
Teaching Hospital of the University of Jena, Germany
President of the International Society of Microbiota

International Society of Microbiota

6th World Congress on

Targeting Microbiota

October 28-30, 2018 - Hotel Crowne Plaza, Porto, Portugal

Scientific Preliminary Agenda

Day 1 – Sunday, October 28

17h00 – 18h00 Registration – Badges & Material Providing

Day 2 – Monday, October 29

7h45 Welcoming & registration of attendees

8h55 Introduction note by President of ISM Targeting Microbiota 2018
Peter Konturek, Teaching Hospital of the University of Jena, Germany

Session 1: Microbiota 2018: Recent Advances & Challenges

9h00 – 15h40

Honor the lodgers? – Interaction between the built environment microbiome and the human microbiome (Skin & Gut)
Markus Egert, Furtwangen University, Germany

Impact of antibiotics and microbiota: recent scientific advances and perspectives
Maria Vehreschild, University Hospital of Cologne, Germany

Recent advances on gut microbiota and food intolerances
Yurdagül Zopf, University of Erlangen-Nuremberg, Germany

Exploring the role of gut dysbiosis in neuroinflammation and hypertension
David Durgan, Baylor College of Medicine, USA

10h40 Coffee Break & Poster Session

Role of microbes in stem cells transplantation related complication
Ernst Holler, University Hospital Regensburg, Germany

12h45 Lunch Break, Network & Poster Session

Short oral presentations (7 minutes presentation + 3 minutes questions)

Altered gut microbiota and endocannabinoid system tone in vitamin D deficiency-mediated chronic pain
Francesca Guida, Università degli Studi della Campania "Luigi Vanvitelli", Italy

Enteric microbiome markers as early predictors of clinical outcome in allogeneic hematopoietic stem cell transplant
Nicasio Mancini, University Vita-Salute San Raffaele, Italy

15h40 Coffee Break, Network & Poster Session

International Society of Microbiota

Session 2: Microbiota recent analysis and methods, bioinformatics & interpretations

16h25 – 18h30

A preliminary study on bioinformatics probiotic database for microbiota

Melike Yilmaz, Izmir Institute of Technology, Turkey

18H00 End of the day

20h30 Targeting Microbiota Dinner

Day 3 – Tuesday, October 30

8h55 Opening of the second day

Session 3: Strategic role of metabolites and mediators on the microbiota-host cross-talk

9h00 – 12h45

Microbiota and mitochondria inter-talk in hemodialysis patients

Marvin Edeas, Université Paris Descartes, Institut Cochin, France

Crosstalk between gut microbiota, innate immune cells and endocrine cells in the pancreas regulates autoimmune diabetes

Julien Diana, Institut National de la Santé et de la Recherche Médicale (INSERM), France

MAIT cells (Mucosal-Associated Invariant T cells) in liver disease and antibacterial response

Antonio Riva, Institute of Hepatology London, Foundation for Liver Research, United Kingdom

The effect of gut bacterial metabolites on cardiovascular risk

Marcin Ufnal, Medical University of Warsaw, Poland

Psycho neuro immunology and gut microbes

Paul Forsythe, McMaster University, Canada

Targeted gut microbiota and short chain fatty acid profile among term and preterm infants

Jan Mazela, Poznan University of Medical Sciences, Poland

10h40 Coffee Break, Network & Poster Session

Short oral presentations (7 minutes presentation + 3 minutes questions)

Prevalence of *akkermansia muciniphila*, *bacteroides vulgatus* and *methanobrevibacter smithii* in the gut microbiota from relapsing-remitting multiple sclerosis patients

Gislane Lelis Vilela de Oliveira, Barretos School of Health Sciences Dr. Paulo Prata, Brazil

Current and new approaches for measuring gut-blood barrier permeability

Kinga Jaworska, Medical University of Warsaw, Poland

Interventional strategies binding the human blood microbiota with the states of health, latent and active tuberculosis

Stefan Panaiotov, National Center of Infectious and Parasitic Diseases, Bulgaria

Stress inflammation gut barrier and microbiota balance

Patrizia d'Alessio, AISA Therapeutics, France

12h45 Lunch Break, Network & Poster Session

International Society of Microbiota

Session 4: Strategies to manipulate microbiota & medicine of tomorrow

This session is focused on effective therapeutic strategies to manipulate gut microbiota including phage therapy, pre- & probiotics treatments, and fecal microbiota transplant (FMT)

14h00 – 17h15

Fecal Microbiota Transplant 2018: What's next?

Peter Konturek, Teaching Hospital of the University of Jena, Germany

Phage therapy strategy to modulate the child stunting microbiota

Mohammadali Khan Mirzaei, McGill University, Canada

15h40 Coffee Break & Poster Session

Short oral presentations (7 minutes presentation + 3 minutes questions)

Microbiota "friendly" lipid nanoparticles to counteract the gastric infection burden

Catarina Leal Seabra, University of Porto, Portugal

Studying the effect of gluten friendly™ bread on the qualitative and quantitative composition of gut microbiota of celiac and healthy people through in vitro fermentation studies

Antonio Bevilacqua, University of Foggia, Italy

Can chronic probiotic intake modulate psychological profile, gut microbiota and body composition of women affected by normal weight obese syndrome and obesity? A double blind randomized clinical trial

Giuseppe Merra, Catholic University of Sacred Heart, Italy

Fermented milk by *Lactobacillus Delbrueckii* CIDCA 133 is able to ameliorate the chemotherapy-induced intestinal mucositis in Balb/c mice

Mariana Martins Drumond, Universidade Federal de Minas Gerais, Brazil

Gut microbiome modulation in patients suffering from irritable bowel syndrome following faecal microbiota transplantation

Subramanya Rao, Asia Microbiota Bank, China

Probiotic supplementation and associated infant gut microbiome and health: a cautionary retrospective clinical comparison

Candice Quin, University of British Columbia, Canada

General discussion & Concluding remarks:

Targeting Microbiota 2018 Awards

18h00 End of Targeting Microbiota 2018
